Founding editor

Samuel J. Raff

Editorial advisory board

V. A. Armentano
University Estadual de Campinas, Brazil

N. Balakrishnan
Clemson University, USA

Jonathan F. Bard
University of Texas at Austin, USA

Reza Barkhi
Virginia Polytechnic Institute & State University, USA

Michael Bastian
Aachen, Germany

Rajan Batta
SUNY at Buffalo, USA

J. E. Beasley
Imperial College, London, UK

Oded Berman
University of Toronto, Canada

R. L. Bulfin
Auburn University, USA

Tom M. Cavalier
Penn State University, USA

Sohail S. Chaudhry
Villanova University, USA

T. C. E. Cheng
Hong Kong Polytechnic, China

Brian W. Conolly
Cambridge, UK

A. Corberán
Univ. of Valencia, Spain

J.-F. Cordeau
HEC Montréal, Canada

N. Curet
National Security Agency, USA

J. R. Current
Ohio State University, USA

Richard F. Deckro
Air Force Institute of Technology, USA

Moshe Dror
University of Arizona, USA

Fred F. Easton
Syracuse University, USA

R. W. Eglese
Lancaster Univ., UK

H. A. Eiselt
University of New Brunswick, Canada

E. A. Elsayed
Rutgers University, USA

E. Erkut
Univ. of Alberta, Canada

E. Fernández
Univ. Politècnica de Catalunya Barcelona, Spain

W. G. Ferrell
Clemson University, USA

James O. Frendewey
Michigan Technological University, USA

Saul Gass
University of Maryland, USA

Parviz Ghandforoush
Virginia Polytechnic Institute & State University, USA

G. Ghiani
Univ. di Lecce, Italy

Bruce Golden
University of Maryland, USA

Jatinder N. D. Gupta
University of Alabama in Huntsville, USA

Michael Hanna
University of Houston, USA

M. Hariga
King Saud University, Saudi Arabia

A. Hertz
Ecole Polytechnique de Montréal, Canada

James P. Ignizio
Intel Corporation, USA

R. J. W. James
University of Canterbury, New Zealand

Mark H. Karwan
SUNY at Buffalo, USA

Rex K. Kincaid
College of William & Mary, USA

Lawrence LaForge
Clemson University, USA

Kenneth D. Lawrence
New Jersey Institute of Technology, USA

Reuven Levarly
St Louis University, USA

S. Lipovetsky
Custom Research Inc., Minneapolis, USA

Christian Madu
LGSB Pace University, USA

Behnam Malakooti
Case Western Reserve University, USA

R. D. McBride
University of Southern California, USA

Patrick G. McKeown
University of Georgia, USA

Hani I. Mesak
Louisiana Tech University, USA

Jo Min
Iowa State University, USA

John Mittenenthal
University of Alabama, USA

A. Mukherjee
University of West Florida, USA

R. A. Murphy
Integrated Decision Support Corp., Richardson, USA

R. Musmanno
Univ. della Calabria, Italy

S. Nickel
Fraunhofer Inst. for Industrial Mathematics, Kaiserslautern, Germany

Kweku-Muata Osei-Bryson
Virginia Commonwealth University, USA

J.-Y. Potvin
Univ. de Montréal, Canada

C. T. Ragsdale
Virginia Polytechnic Institute, USA

A. Ravindran
Pennsylvania State University, USA

Tzri Raz
Leon Recanti Graduate School of Business Administration, Israel

Gary Reeves
University of South Carolina, USA

Jeffrey Ringuest
Boston College, USA

D. J. Robb
University of Auckland, New Zealand

David F. Rogers
University of Cincinnati, USA

R. Santhanam

B. R. Sarker
Louisiana State Univ., USA

Mark Schniederjans
University of Nebraska, USA

F. Semet
Univ. de Valenciennes, France

Jati K. Sengupta
University of California, USA

Hanif D. Sherali
Virginia Polytechnic Institute & State University, USA

David K. Smith
University of Exeter, UK

Kate A. Smith
Monash University, Australia

Rajendra Solanki
Flower Mound, USA

Frits C. R. Spieksma
Katholieke Universiteit Leuven, Belgium

Robert T. Sumicrast
Virginia Polytechnic Institute & State University, USA

Bernard W. Taylor III
Virginia Polytechnic Institute & State University, USA

Evangelos Triantaphyllou
Louisiana State University, USA

Rudolph Vetschera
University of Vienna, Austria

A. Volgenant
University of Amsterdam, The Netherlands

P. P. Wang
University of Alabama, USA

H.-M. Wee
Chung Yuan Christian University, Taiwan

Howard J. Weiss
Temple University, USA

Ue-Pyng Wen
National Tsing Hua University, Taiwan

Robert J. Willis
Monash University, Australia

E. P. Winkofsky
Mead School & Office Products Dayton, USA

List of Contents

NUMBER 1

- | | | |
|--|-----|---|
| Chih-Hsiung Wang and S.H. Sheu | 1 | Determining the optimal production-maintenance policy with inspection errors: using a Markov chain |
| W. Wang and A.H. Christer | 19 | Solution algorithms for a nonhomogeneous multi-component inspection model |
| Seong Whan Shinn and Hark Hwang | 35 | Optimal pricing and ordering policies for retailers under order-size-dependent delay in payments |
| T.C.E. Cheng and Q. Ding | 51 | Scheduling start time dependent tasks with deadlines and identical initial processing times on a single machine |
| P.L. Abad | 63 | Optimal price and lot size when the supplier offers a temporary price reduction over an interval |
| Mélanie Bourgeois, Gilbert Laporte and Frédéric Semet | 75 | Heuristics for the black and white traveling salesman problem |
| Fernando Y. Chiyoshi, Roberto D. Galvão and Reinaldo Morabito | 87 | A note on solutions to the maximal expected covering location problem |
| R. Patterson and E. Rolland | 97 | The cardinality constrained covering traveling salesman problem |
| Kyu-Yeul Lee, Seong-Nam Han and Myung-Il Roh | 117 | An improved genetic algorithm for facility layout problems having inner structure walls and passages |
| Dieter Fiems, Bart Steyaert and Herwig Bruneel | 139 | Analysis of a discrete-time GI-G-1 queueing model subjected to bursty interruptions |
| Kim Fung Lam and Jane W. Moy | 155 | A simple weighting scheme for classification in two-group discriminant problems |

NUMBER 2

- | | | |
|---|-----|--|
| Luis Gonzalo Acosta Espejo, Roberto D. Galvão and Brian Boffey | 165 | Dual-based heuristics for a hierarchical covering location problem |
| J.J. Glen | 181 | An iterative mixed integer programming method for classification accuracy maximizing discriminant analysis |
| Parag C. Pendharkar | 199 | Characterization of aggregate fuzzy membership functions using Saaty's eigenvalue approach |
| W.H. Ip, Min Huang, K.L. Yung and Dingwei Wang | 213 | Genetic algorithm solution for a risk-based partner selection problem in a virtual enterprise |
| Chuen-Lung Chen, Rong-Ho Lin and Jianping Zhang | 233 | Genetic algorithms for MD-optimal follow-up designs |
| Antoine Kreidi and Brunilde Sansó | 253 | Optimization of an internationally distributed air-ground airline telecommunication system |
| Shouhong Wang | 279 | Adaptive non-parametric efficiency frontier analysis: a neural-network-based model |

Kefeng Xu and Philip T. Evers

**Ali Tozkapan, Ömer Kırca
and Chia-Shin Chung**

- 297 Managing single echelon inventories through demand aggregation and the feasibility of a correlation matrix
- 309 A branch and bound algorithm to minimize the total weighted flowtime for the two-stage assembly scheduling problem

NUMBER 3

**Barrie M. Baker and Carlos
A.C. Carreto**

**Peter X. Liu, Ming J. Zuo and
Max Q.-H. Meng**

**Nam K. Kim and Kyung
C. Chae**

Kevin R. Gue

**J. Gutiérrez, A. Sedeño-
Noda, M. Colebrook and
J. Sicilia**

G. Levitin and R. Abezgouz

Esmail Mohebbi

**Hiroyuki Kubotani and
Kazuyuki Yoshimura**

**Patrick R. McMullen, Mark
Clark, David Albritton and
John Bell**

**R.H. Loschi, F.R.B. Cruz, P.L.
Iglesias and R.B. Arellano-
Valle**

- 321 A visual interactive approach to vehicle routing
- 339 Using neural network function approximation for optimal design of continuous-state parallel-series systems
- 353 Transform-free analysis of the GI/G/1/K queue through the decomposed Little's formula
- 367 A dynamic distribution model for combat logistics
- 383 A new characterization for the dynamic lot size problem with bounded inventory
- 397 Optimal routing of multiple-load AGV subject to LIFO loading constraints
- 411 Supply interruptions in a lost-sales inventory system with random lead time
- 427 Performance evaluation of acceptance probability functions for multi-objective SA
- 443 A correlation and heuristic approach for obtaining production sequences requiring a minimum of tool replacements
- 463 A Gibbs sampling scheme to the product partition model: an application to change-point problems

NUMBER 4

**Kun-Jen Chung and Kuo-
Lung Hou**

**Fayez F. Boctor, Gilbert
Laporte and Jacques Renaud**

**Vincent T'kindt, Jatinder
N.D. Gupta and Jean-Charles
Billaut**

**Elkafi Hassini and Raymond
G. Vickson**

**Chiang Kao, Chang-Chung Li
and Shih-Pin Chen**

**J. Bhadury, H.A. Eiselt and
J.H. Jaramillo**

- 483 An optimal production run time with imperfect production processes and allowable shortages
- 491 Heuristics for the traveling purchaser problem
- 505 Two-machine flowshop scheduling with a secondary criterion
- 527 A two-carousel storage location problem
- 541 Simulation response optimization via direct conjugate direction method
- 553 An alternating heuristic for medianoid and centroid problems in the plane

Yi-Kuei Lin	567	Extend the quickest path problem to the system reliability evaluation for a stochastic-flow network
Donald E.K. Martin	577	An algorithm to compute the probability of a run in binary fourth-order Markovian trials
K.-H. Chang and W.-F. Chen	589	Admission control policies for two-stage tandem queues with no waiting spaces
G. Galán-Marín, E. Mérida-Casermeyro and J. Muñoz-Pérez	603	Modelling competitive Hopfield networks for the maximum clique problem
Dennis C. Dietz, Amie J. Elcan and Daphne E. Skipper	625	Optimization models for ATM network planning

NUMBER 5

John W. Chinneck, Vitoria Pureza, Rafik A. Goubran, Gerald M. Karam and Marco Lavoie	643	A fast task-to-processor assignment heuristic for real-time multiprocessor DSP applications
Po-Chung Yang and Hui-Ming Wee	671	An integrated multi-lot-size production inventory model for deteriorating item
Muhammad El-Taha	683	Allocation of service time in a two-server system
N. Hemachandra and Sarat Kumar Eedupuganti	695	Performance analysis and buffer allocations in some open assembly systems
José M. Belenguer and Enrique Benavent	705	A cutting plane algorithm for the capacitated arc routing problem
Celik Parkan	729	Measuring the effect of a new point of sale system on the performance of drugstore operations
Jonathan F. Bard, Canan Binici and Anura H. deSilva	745	Staff scheduling at the United States Postal Service
In-Chan Choi, Seong-In Kim and Hak-Soo Kim	773	A genetic algorithm with a mixed region search for the asymmetric traveling salesman problem
Barrie M. Baker and M. A. Ayechev	787	A genetic algorithm for the vehicle routing problem
Hongyi Sun and Guoqing Wang	801	Parallel machine earliness and tardiness scheduling with proportional weights

NUMBER 6

Special Issue: Emerging Economics

Guest Editor: Li D. Xu

Sohail Chaudhry, Huaizu Li, Hong Zhang and Li Da Xu	809	Computers and operations research in emerging economies
Zhili Zhou and Ling Li	811	Single hoist cyclic scheduling with multiple tanks: a material handling solution

- | | | |
|--|-----|--|
| Shan Feng, Ling Li, Ling Cen and Jingping Huang | 821 | Using MLP networks to design a production scheduling system |
| Vasile Bostan and Ling Li | 833 | A decision model for reducing active power losses during electric power dispatching |
| Zongbin Li and Li Da Xu | 851 | Polychromatic sets and its application in simulating complex objects and systems |
| K.K. Lai, J. Xue and B. Xu | 861 | A cross-border transportation system under supply and demand constraints |
| Shiying Xu, Li Da Xu and Xiufang Chen | 877 | Determining optimum edible films for kiwifruits using an analytical hierarchy process |
| An-Sing Chen and Mark T. Leung | 887 | A Bayesian vector error correction model for forecasting exchange rates |
| An-Sing Chen, Mark T. Leung and Hazem Daouk | 901 | Application of neural networks to an emerging financial market: forecasting and trading the Taiwan Stock Index |
| Yi Xu and Bhaba R. Sarker | 925 | Models for a family of products with shelf life, and production and shortage costs in emerging markets |

NUMBER 7

- | | | |
|--|------|---|
| Shiwei He, Rui Song and Sohail S. Chaudhry | 939 | An integrated dispatching model for rail yards operations |
| Boris Goldengorin, Diptesh Ghosh and Gerard Sierksma | 967 | Branch and peg algorithms for the simple plant location problem |
| Vladimir Marianov and Daniel Serra | 983 | Location models for airline hubs behaving as M/D/c queues |
| Juan A. Carrasco | 1005 | Computation of bounds for transient measures of large rewarded Markov models using regenerative randomization |
| Yen-Liang Chen and Li-Jen Hsiao | 1037 | Shipping problems with body clock constraints |
| Hsi-Mei Chen | 1051 | An optimal control problem in determining the optimal reinforcement schedules for the Lanchester equations |
| P.P.A. Storms and F.C.R. Spijksma | 1067 | An LP-based algorithm for the data association problem in multitarget tracking |
| Jeffery K. Cochran, Shwu-Min Horng and John W. Fowler | 1087 | A multi-population genetic algorithm to solve multi-objective scheduling problems for parallel machines |

NUMBER 8

- | | | |
|--|------|---|
| Chung-Chi Hsieh and Yi-Che Hsieh | 1103 | Reliability and cost optimization in distributed computing systems |
| Jukka K. Nurminen | 1121 | Using software complexity measures to analyze algorithms—an experiment with the shortest-paths algorithms |
| G. Viswanathkumar and G. Srinivasan | 1135 | A branch and bound algorithm to minimize completion time variance on a single processor |

- | | | |
|---|------|---|
| Yeo Keun Kim, Kitae Park and Jesuk Ko | 1151 | A symbiotic evolutionary algorithm for the integration of process planning and job shop scheduling |
| C.T. Daniel Ng, T.C. Edwin Cheng, Mikhail Y. Kovalyov and S.S. Lam | 1173 | Single machine scheduling with a variable common due date and resource-dependent processing times |
| Monica Gentili | 1187 | Visiting a network of services with time constraints |
| Tariq Aldowaisan and Ali Allahverdi | 1219 | New heuristics for no-wait flowshops to minimize makespan |
| Madhu Jain and Poonam Singh | 1233 | Performance prediction of loss and delay Markovian queueing model with nopassing and removable additional servers |
| <i>Note</i> | | |
| Bruce J. Chaderjian and Tangan Gao | 1255 | Comments on "An efficient search direction for linear programming problems" by H. Luh and R. Tsaih |

NUMBER 9

- | | | |
|---|------|---|
| Surabhi Sinha | 1259 | Fuzzy mathematical programming applied to multi-level programming problems |
| R. Wolfler Calvo and R. Cordone | 1269 | A heuristic approach to the overnight security service problem |
| Bong Dae Choi, Bara Kim and Sung Ho Choi | 1289 | An $M/G/1$ queue with multiple types of feedback, gated vacations and FCFS policy |
| Kun-Jen Chung | 1311 | An algorithm for an inventory model with inventory-level-dependent demand rate |
| Fang-Chuan Lee and Ming-Jong Yao | 1319 | A global optimum search algorithm for the joint replenishment problem under power-of-two policy |
| C.J. Liao and W.J. Chen | 1335 | Single-machine scheduling with periodic maintenance and nonresumable jobs |
| Bülent Çatay, Ş. Selçuk Erengüç and Asoo J. Vakharia | 1349 | Tool capacity planning in semiconductor manufacturing |
| Nikolaos F. Giannelos and Michael C. Georgiadis | 1367 | Efficient scheduling of consumer goods manufacturing processes in the continuous time domain |
| Konstantinos Paparrizos, Nikolaos Samaras and George Stephanides | 1383 | A new efficient primal dual simplex algorithm |
| Bong-Ryong Jung, Byung-Geun Sun, Jong-Soo Kim and Sun-Eung Ahn | 1401 | Modeling lateral transshipments in multiechelon repairable-item inventory systems with finite repair channels |

NUMBER 10

Focused Issue: Analytic Hierarchy Process

Guest Editors: Bruce L. Golden and Edward A. Wasil

- | | | |
|-------------------------------|------|---|
| E. Wasil and B. Golden | 1419 | Celebrating 25 years of AHP-based decision making |
|-------------------------------|------|---|

- | | | |
|--|------|---|
| Matthew J. Liberatore, Ronald E. Myers, Robert L. Nydick, Michael Steinberg, Earl R. Brown, Roy Gay, Thomas Powell and Roberta Lee Powell | 1421 | Decision counseling for men considering prostate cancer screening |
| Edward Condon, Bruce Golden and Edward Wasil | 1435 | Visualizing group decisions in the analytic hierarchy process |
| Elliot B. Sloane, Matthew J. Liberatore, Robert L. Nydick, Wenhong Luo and Q.B. Chung | 1447 | Using the analytic hierarchy process as a clinical engineering tool to facilitate an iterative, multidisciplinary, microeconomic health technology assessment |
| Qing Li and Hanif D. Sherali | 1467 | An approach for analyzing foreign direct investment projects with application to China's Tumen River Area development |
| Lawrence Bodin and Saul I. Gass | 1487 | On teaching the analytic hierarchy process |
| General Papers | | |
| Kun-Jen Chung | 1499 | Approximations to production lot sizing with machine breakdowns |
| Dirk Biskup, Dirk Simons and Hermann Jahnke | 1509 | The effect of capital lockup and customer trade credits on the optimal lot size—a confirmation of the EPQ |
| Alexander Simampo and Sarah M. Ryan | 1525 | Capacity expansion for a loss system with exponential demand growth |
| Zelda B. Zabinsky, Robert L. Smith and Birna P. Kristinsdottir | 1539 | Optimal estimation of univariate black-box Lipschitz functions with upper and lower error bounds |
| Christos Valouxis and Efthymios Housos | 1555 | Constraint programming approach for school timetabling |

1573 Call for Papers

NUMBER 11

- | | | |
|---|------|---|
| Evelyn C. Brown and Robert T. Sumichrast | 1575 | Impact of the replacement heuristic in a grouping genetic algorithm |
| Yi-Kuei Lin | 1595 | Using minimal cuts to study the system capacity for a stochastic-flow network in two-commodity case |
| M.D.H. Gamal and S. Salhi | 1609 | A cellular heuristic for the multisource Weber problem |
| Jaydeep Balakrishnan, Chun-Hung Cheng and Kam-Fai Wong | 1625 | FACOPT: a user friendly FACility layout OPTimization system |
| Ekaterina M. Gratcheva and James E. Falk | 1643 | Optimal deviations from an asset allocation |
| M.A. Kaboudan | 1661 | Forecasting with computer-evolved model specifications: a genetic programming application |
| Oded Berman, Zvi Drezner and George O. Wesolowsky | 1683 | Locating service facilities whose reliability is distance dependent |

Min-Sheng Lin

- 1697 Linear-time algorithms for computing the reliability of bipartite and ($\# \leq 2$) star distributed computing systems

Erwin Kalvelagen

- 1713 On solving the progressive party problem as a MIP

P. Patrick Wang, Mingqing Gong and Tanyu Lee

- 1727 Waiting time in a combined first-come-first-served and shortest-time-first queue

Note

Avital Lann and Gur Mosheiov

- 1745 A note on the maximum number of on-time jobs on parallel identical machines

- 1751 Call for papers

NUMBER 12

Yong-Wu Zhou, Hon-Shiang Lau and Shan-Lin Yang

- 1753 A new variable production scheduling strategy for deteriorating items with time-varying demand and partial lost sale

Ching-Fang Liaw, Yang-Kuei Lin, Chun-Yuan Cheng and Mingchin Chen

- 1777 Scheduling unrelated parallel machines to minimize total weighted tardiness

Hani I. Mesak

- 1791 On deriving and validating comparative statics of a symmetric model of advertising competition

Joris Walraevens, Bart Steyaert and Herwig Bruneel

- 1807 Performance analysis of a single-server ATM queue with a priority scheduling

Masao Yokoyama and Harold W. Lewis III

- 1831 Optimization of the stochastic dynamic production cycling problem by a genetic algorithm

Dong Hwan Han, Chul Geun Park and Kwang Hyun Baik

- 1851 Performance analysis of an AAL multiplexer with dynamic bandwidth allocation in an IP/ATM environment

M. Eugénia Captivo, João Climaco, José Figueira, Ernesto Martins and José Luis Santos

- 1865 Solving bicriteria 0-1 knapsack problems using a labeling algorithm

R.L. Bulfin and Rym M'Hallah

- 1887 Minimizing the weighted number of tardy jobs on a two-machine flow shop

Note

S. Khanra and K.S. Chaudhuri

- 1901 A note on an order-level inventory model for a deteriorating item with time-dependent quadratic demand

NUMBER 13

Koo-Min Ahn and Sehun Kim

- 1917 Optimal bandwidth allocation for bandwidth adaptation in wireless multimedia networks

Tetsuya Fujie

- 1931 An exact algorithm for the maximum leaf spanning tree problem

- | | | |
|--|------|--|
| José A. Ventura and Dae-cheol Kim | 1945 | Parallel machine scheduling with earliness-tardiness penalties and additional resource constraints |
| David C. Novak, Daniel Rowland and Luiz DaSilva | 1959 | Modeling dialup internet access: an examination of user-to-modem ratios, blocking probability, and capacity planning in a modem pool |
| Joana Dias, M. Eugénia and João Clímaco | 1977 | An interactive procedure dedicated to a bicriteria plant location model |
| Thomas Yew Sing Lee | 2003 | Analysis of random polling system with an infinite number of coupled servers and correlated input process |
| Ho Woo Lee, No Ik Park and Jongwoo Jeon | 2021 | A new approach to the queue length and waiting time of BMAP/G/1 queues |
| Qian Wang, Rajan Batta, Joyendu Bhadury and Christopher M. Rump | 2047 | Budget constrained location problem with opening and closing of facilities |
| <i>Note</i> | | |
| Philippe Baptiste | 2071 | A note on scheduling multiprocessor tasks with identical processing times |
| | 2079 | Call for papers |

NUMBER 14

- | | | |
|---|------|---|
| Ching-Fang Liaw | 2081 | An efficient tabu search approach for the two-machine preemptive open shop scheduling problem |
| Adel A. Ghobbar and Chris H. Friend | 2097 | Evaluation of forecasting methods for intermittent parts demand in the field of aviation: a predictive model |
| Yong-Wu Zhou | 2115 | A multi-warehouse inventory model for items with time-varying demand and shortages |
| Hong Yan, Zhenxin Yu and T.C. Edwin Cheng | 2135 | A strategic model for supply chain design with logical constraints: formulation and solution |
| K. Steinhöfel, A. Albrecht and C.K. Wong | 2157 | An experimental analysis of local minima to improve neighbourhood search |
| William Ho and Ping Ji | 2175 | Component scheduling for chip shooter machines: a hybrid genetic algorithm approach |
| Emanuel Melachrinoudis and Zaharias Xanthopoulos | 2191 | Semi-obnoxious single facility location in Euclidean space |
| Jihong Ou and B. Madhu Rao | 2211 | Benefits of providing amenities to impatient waiting customers |
| <i>Erratum</i> | | |
| Nam K. Kim and Kyung C. Chae | 2227 | Erratum to "Transform-free analysis of the GI/G/1/K queue through the decomposed Little's formula" [Comput. Oper. Res. 30(3) 353-365] |
